

# Discussion

- LCA, CFP, SCOPE3, Eco label, etc: Can these communication tools change Consumption and Production patterns?
- What is your experience to link your network with non-LCA networks, which collaboration, which purpose, which benefits, which difficulties, how to go over difficulties?
  - How can we link academic societies and industrial networks?
  - What worked well / not so well in your network for mobilizing your community?
- What would be your advice to those who want to create a network at their regional / national / trans-national scale, according to your experience? How to get budget to make a network function?
